What Is This Product?

Type

This is a closed-end Investment Company.

Investment Objective

The Company's investment objective is to achieve long-term capital appreciation by investing in a diversified portfolio of companies that have high growth potential at an attractive valuation.

Investment Policy

The Company attempts to achieve its investment objective by investing in the securities of publicly traded companies in Vietnam, and in the securities of foreign companies if a majority of their assets and/or operations are based in Vietnam. The Company may invest in equity securities or securities that have equity features, such as bonds that are convertible into equity.

The Company may invest in listed or unlisted securities, either on the Vietnamese stock exchanges, through purchases on the OTC Market, or through privately negotiated deals.

Investment Policy (continued)

The Company may invest its available cash in the domestic bond market as well as in international bonds issued by Vietnamese entities.

The Company may utilise derivatives contracts for hedging purposes and for efficient portfolio management but will not utilise derivatives for investment purposes.

The Company does not intend to take control of any company or entity in which it has directly or indirectly invested (an “Investee Company”) or to take an active management role in any such company. However, the Investment Manager may appoint one of its directors, employees or other appointees to join the board of the Investee Company and/or may provide certain forms of assistance to such company, subject to prior approval by the VNH Board.

The Company integrates environmental, social and corporate governance (ESG) factors into its investment analysis and decision-making process. Through its Investment Manager, the Company actively incorporates ESG considerations into its ownership policies and practices and engages Investee Companies in pursuit of appropriate disclosure and the improvement of material issues.

The Company may invest:

- up to 25 percent of its Net Asset Value (“NAV”) (at the time of investment) in companies with shares traded outside of Vietnam if a majority of their assets and/or operations are based in Vietnam;
- up to 20 percent of its NAV (at the time of investment) in direct private equity investments; and
- up to 20 percent of its NAV (at the time of investment) in other listed investment funds and holding companies which have the majority of their assets in Vietnam.

Borrowing Policy

The Company is permitted to borrow money and to grant security over its assets provided that such borrowings do not exceed 25 percent of the latest available NAV of the Company at the time of the borrowing unless the Shareholders in general meeting otherwise determine by ordinary resolution.

Investment Restrictions And Diversification

The Company will adhere to the general principle of risk diversification in respect of its investments and will observe the following investment restrictions.

Investment Restrictions And Diversification (continued)

- The Company will not invest more than 10 percent of its NAV (at the time of investment) in the shares of a single Investee Company;
- The Company will not invest more than 30 percent of its NAV (at the time of investment) in any one sector;
- The Company will not invest directly in real estate or real estate development projects, but may invest in companies which have a large real estate component, if their shares are listed or are traded on the OTC Market; and
- The Company will not invest in any closed-ended investment fund unless the price of such investment fund is at a discount of at least 10 percent to such investment fund's net asset value (at the time of investment).

Responsible Investment Policy

The Company is a signatory of the United Nations Principles for Responsible Investment (UNPRI) and strictly follows the Six Principles for Responsible Investing. The Company reports on its responsible investment activities every year through the PRI Transparency Reporting framework.

The Company has developed its own exclusion list based on guidelines of IFC and UNPRI. The Company will not invest, or finance companies involved in the company's exclusion list.

The Company's ESG sub-committee oversees the Investment Manager's own ESG Management System that seeks to:

- integrate ESG issues into each step of the investment process: initial screening, due diligence, investment decision and investment monitoring;
- provide a framework for monitoring and reporting on ESG aspects to stakeholders; and
- work in partnership with its portfolio companies to help them identify and implement ESG opportunities, creating sustainable enhancement to their overall financial performance.

The Company supports the Investment Manager's Company Engagement Program to provide advocacy, training and support to its investee companies along their ESG journey.

The Company is a supporter of the Paris Agreement and the Task Force on Climate-related Financial Disclosures (TCFD). The Company pays particular attention to manage the climate risks of the portfolio by keeping track of the portfolio's total carbon emissions, analysing the transition risks of climate-sensitive industries and helping investee companies to do more on reporting their carbon emissions. The Company measures and publicly reports its own carbon footprint and engages a specialist firm to estimate the portfolio-level carbon footprint. Through its Investment Manager it assesses the performance of the portfolio's investee companies in matching their activities to the UN Sustainable Development Goals.

Intended Retail Investor

The fund is intended for institutional investors and professionally advised or financially sophisticated non-advised investors including retail investors seeking exposure to predominantly listed investments.

Maturity

Subject to the continuation vote arrangements described below, this product does not have a maturity date. There are no provisions entitling the manufacturer of this product to terminate the product unilaterally, nor for the automatic termination of the product.

What Are The Risks And What Could I Get In Return?

Summary Risk Indicator

Be aware of currency risk. The PRIIP is denominated in a different currency to that at which it is marketed, so the final return will depend on the exchange rate between the currencies. This risk is not considered in the indicator above.

The risk indicator assumes you keep the Product for 5 years. The PRIIP holds no capital protection against market risk. The PRIIP holds no capital guarantee against credit risk.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay what is owed, you could lose your entire investment.

Performance Scenarios

Investments of USD 10,000		1 Year	3 Years	5 Years
Stress Scenario	What you might get back after costs	\$3,043	\$4,085	\$3,022
	Average return each year	-69.57%	-25.80%	-21.29%
Unfavourable Scenario	What you might get back after costs	\$7,854	\$6,681	\$6,022
	Average return each year	-21.46%	-12.58%	-9.64%
Moderate Scenario	What you might get back after costs	\$10,136	\$10,380	\$10,630
	Average return each year	1.36%	1.25%	1.23%
Favourable Scenario	What you might get back after costs	\$13,010	\$16,039	\$18,660
	Average return each year	30.10%	17.06%	13.29%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest USD 10,000 from the outset. The scenarios shown illustrate how your investments could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get back will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Past performance should not be a guide to future returns. Your maximum loss would be that you will lose all your investment.

What Happens If Vietnam Holding Limited Is Unable To Pay Out?

You may ordinarily sell your shares at any time during trading hours on the London Stock Exchange using your broker. Your shares would be sold to a buyer in the market without recourse to the Company. If the Company goes into liquidation the investments will be sold and you will receive your pro rata share of the proceeds after settlement of the Company's liabilities, in accordance with the articles of association of the Company. You will not be entitled to compensation from the Financial Services Compensation Scheme or any other compensation scheme and no guarantee scheme applies to an investment in the Company.

What Are The Costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Costs Over Time

Investments of USD 10,000	If you cash in after:	1 year	3 years	5 years
Total Costs		\$296	\$937	\$1,647
